The following is an examiner's statement of reasons for allowance: The prior art taken as a whole neither teaches nor renders obvious the combination including an annular member mounted on the shaft member corresponding to the capillary seal part, an annular member on the bearing member at a location corresponding to the capillary seal part, a taper or step formed on the inner and outer peripheries of the annular members, wherein the outer periphery surface and the annular member on the shaft member side and the inner periphery surface of the annular member on the bearing member side are arranged close to each other in the axial and radial directions to form the capillary seal part, and to prevent the rotating parts and the stationary parts from disengaging from each other.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
